SOME QUESTION TO ASK FLAT EARTH BELIEVERS

1. And where are your mathematics that debunk the 10 reasons we know the Earth is round?
2. Where are your articles in peer-reviewed journals?
3. Where are your observations, your photos, your astronauts that have been on the International Space Station?
4. Where are your GPS systems that work based on the fact we know the Earth is round.
5. Where are your satellite television network and internet satellites that work based on Flat Earth principles?
6. Where is your evidence that that the Earth is different and not round like the other planets for no reason at all?
7. Where is your proof of conspiracies regarding the picture of the Earth? We have hundreds of satellites orbiting Earth at various distances, the only way we can take pictures of some of the celestial objects that astronomers study is by putting satellites in space.
8. So all the pictures of the other planets being round are true, but the one of the Earth is not?
9. Excuse me, where is everyone's (by everyone, I mean everyone who believes the nonsense of the flat earth) PhD or engineering degree that actually is responsible for building rockets, satellites, GPS systems, etc?
